# Large Diameter HDPE Water Supply and Gas Supply Pipe Extrusion Line

## Large Diameter HDPE Water Supply and Gas Supply Pipe Extrusion Line

- Features & Advantages: The Large Diameter HDPE/MDPE Pipe Extrusion Line research &

developed by Jwell Machinery Co., features of unique structure, easily control, highly

automation and stable performance. Pipes produced by this machine has the moderate rigidity,

strength, as well as good flexibility, anti-rot, anti-stress split, and favorable hot melting, make

---

this large diameter pipe considered as the prefer product for water and gas transportation

system in cities.

Features & Advantages: The modern developed 2-layer or 3-layer spiral mould is specially for

double-anti pipe extrusion. This pipe owns even and equal co-extrusion wall thickness, the inner

and outer wall made of double-anti material (Anti-flammable, anti static electricity), the core

layer of HDPE wall, reasonably reduce the costs of double-anti material, accordingly reduced

the costs of the whole product.
