

Plastic And Wood Profile And Plate Extrusion Line

Plastic And Wood Profile And Plate Extrusion Line

After the line add or replacing the different spare part , can be produced plastic steel window profile?pinch plate?window sill?siding plate?corrugated sheets and wpc of floor?fences ?door panel?door pocket?lines, etc.
At present WPC extrusion line has two ways: one step way and two steps way: one step way mainly used to produce PVC wood plastic product, two steps way mainly used to extrude PP/PE wood plastic product. The screws and barrel is treated by bimetal treatment, wearable and anti-erode, featured in good plasticization, high capacity, energy saving and wood powder and the other wooden fibre can occupied high quantity as 50-70%. This equipment is an ideal choice for customers who want to produce wood tray, indoors and outdoors floor, fences, warehouse plate and outdoors decorative material and so on.

生产线主要技术参数 Parameters of extrusion line

型号(Model)	锥双挤出机	YF180	YF240	YF300	YF400	YF500
规格(mm)	SJZ65/132	180	240	300	400	500
功率(kw)	37KW	26.1	31.6	31.6	37.1	37.1
用水量(m³/h)	2	5	5	5	7	8
用气量(Mpa)	0	0.6	0.6	0.6	0.6	0.6
